There are many **optics** at Portopí

They were invented by M. **FRESNEL**.  
What would you ask to M. Fresnel?

There are many rotating **OPTICS** at Portopí.

At some lighthouses they rotate once every minute.

Do you know how many times they would rotate

in 5 minutes?.....times

in 10 minutes?.....times

If half an hour is 30 minutes they would rotate .....times.

And in an hour they would rotate **30 X .....** = ..... **times.**

Portopí lighthouse works with this light bulb.

Now all lighthouses use **ELECTRICITY**.

But how do you think that lighthouses worked before the existence of electricity?

Put a circle around the right answer.

**With water**

**With paper**

**With flour**

**With alcohol**

**With gas**

Answer: g for grass + a for apple + s for sun =.....

Did you know there are many different types of navigational aids?

YES

NO

Join the picture with the right navigational aid:

• a foggy night

• far from land.

• at the entrance to a harbour

Foghorn

Lighthouse

Buoy

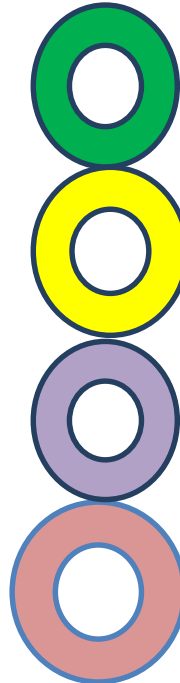

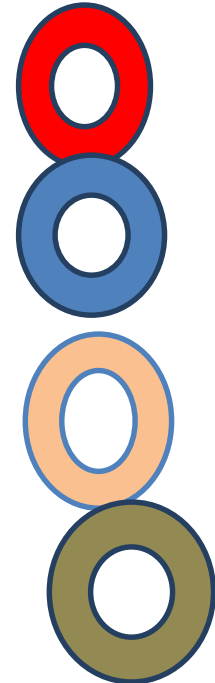

Write **TRUE** or **FALSE**

- **Portopí Lighthouse is in the Balearic Islands.**
- **Lighthouses do not exist.**
- **Lighthouses can be big or small.**
- **There are many lighthouses in the Balearic Islands.**

**V**

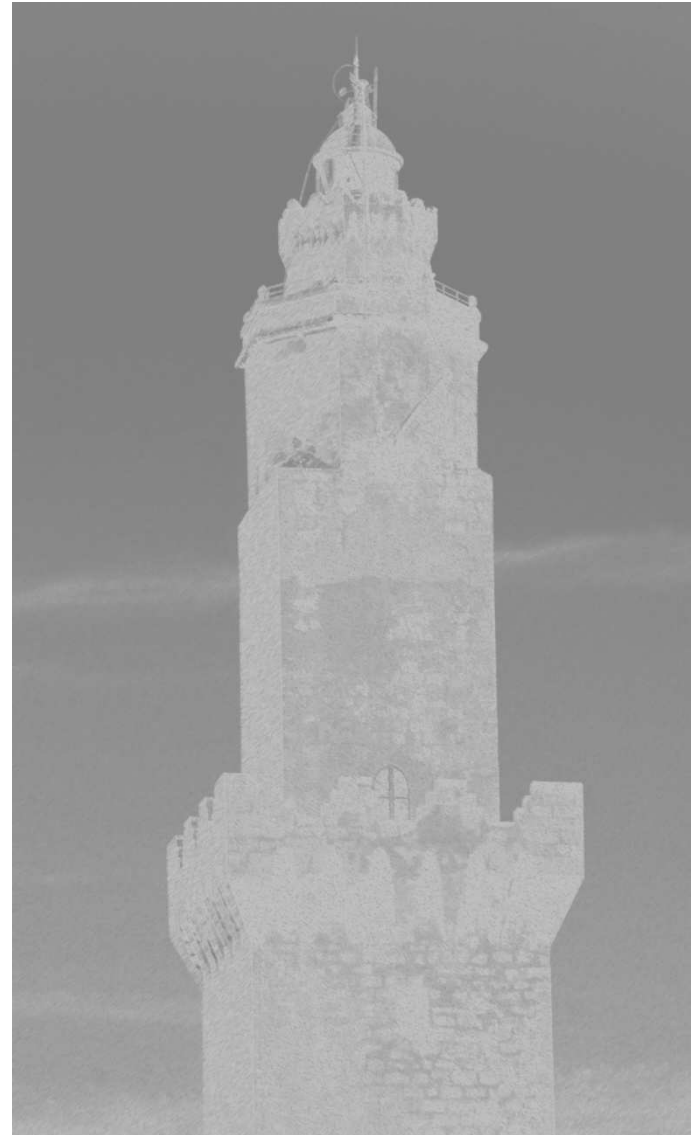

**F**
